SIMPLE. SECURE. GOVERNANCE.

# **Next Generation Security Platform**

Invest in early access to the first-of-its-kind cyber security platform built on principles of Zero Trust and Data Security First. Explore how we make your security easier, enhances user productivity, and helps you get the most out of your IT and security expenditures to secure your cloud platform.

# **Easier Cloud Security and Governance**

Protect your business and customer data with proven enterprise-wide security controls and continuously optimize your security posture, ensuring improved efficiency & prevent security drift with continuous monitoring of Cloud Security Posture Management for IaaS and PaaS workloads.

We assure, you are compliance with all regulatory standards.

# Cloud Security Posture Management

Secure and simplify the complexity of Multi-Cloud environment with a real-time observability and remediation.

# Cloud Entitlement Management

Offers cloud identity monitoring and governance to enforce the least privileges to mitigate the cyber security risk.

#### **Data Security**

Secure all the popular database technologies and compliant with data configuration and privacy regulations globally.

#### Shift Left

Improve the quality of your software life cycle in the most efficient way possible, saving time in the pipeline correcting issues and implementing integrated security.

# What our client say about us?

Efficient, Agile, and Innovative were some of the qualities we observed with Banyan Cloud. We could quickly adapt to a platform, which is securing our multi-cloud environment that is serving the hundreds of Via customers.

Gregory Woodfield / COO, Via
